

Hot HandRap™

The HotRap™ system is based on a combination of lightweight film adhered to a profiled corrugated board to form a receptacle to eat from.

- Can be stored in hot cabinets for up to a maximum of 4 hours, while keeping the product as tasty as when it went in
- Microwaveable
- Insulation against high temperatures
- Ergonomic design aids eating on the move
- Unique construction protects the product
- Reduced distribution and storage costs through flat pack design
- Keeps the food hot and fresh
- Gives maximum product visibility
- Easy to assemble and pack product
